BERKOL® PU aprons

Polyurethane is a highly abrasion- and ozone resistant material. BERKOL® has utilised these particular characteristics and has developed a single-layer, seamless PU apron.

BERKOL PU aprons are used only as top apron and achieve in combination with rubber or leather bottom aprons excellent yarn values.

Your advantages:

- Substantial longer life time than classical rubber aprons
- Long shelf life as a result of the ozone resistance
- Excellent and steady performance throughout the whole running time
