WORLD OF PERFORMANCE

SAPHIR Travellers

A story of success since 1985

- Over 15'000'000'000 travellers in **Saphir** finish sold
- Holds the leading position in the market

Characteristics

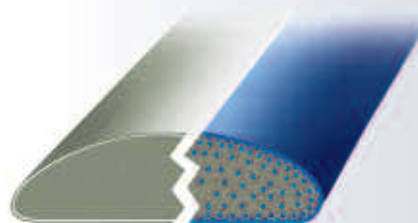

- Diffusion treatment of surface and body
- Best performing even with affected traveller surface
- Excellent gliding properties
- Gentle treatment of ring surface

Performance

- Favourable price/performance ratio
- Longer lifetime
- Less traveller changes
- Reduced traveller wear
- Constant low yarn break rates

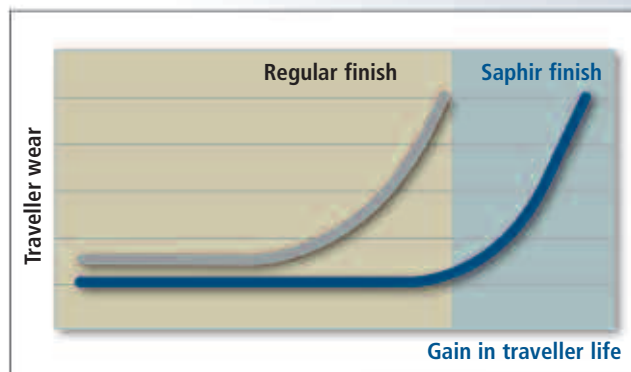

Application

- For high traveller and spindle speeds
- For regular operation as well as running-in
- For all fibre materials and yarn counts

Regular coating:
Only surface is treated

Saphir diffusion treatment:
Entire traveller material is enriched
