

**Bräcker**

## THERMO 800 rings

The universally applicable Bräcker spinning ring

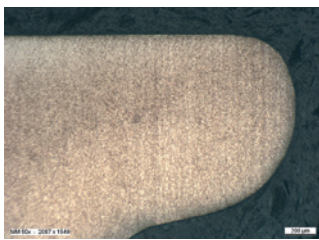

## THERMO 800 – the suitable ring for any application

This spinning ring is suitable for a broad yarn count range in the average performance segment. It is especially recommended for spinning core yarns for sewing threads and Denim yarns.

The THERMO 800 rings are made of tempered steel and are available in flange 1 and 2 execution only.

The special thermo-chemical surface treatment allows a flexible and wide range of applications.

The THERMO 800 rings have, due to their very competitive price, a most attractive price-performance ratio.

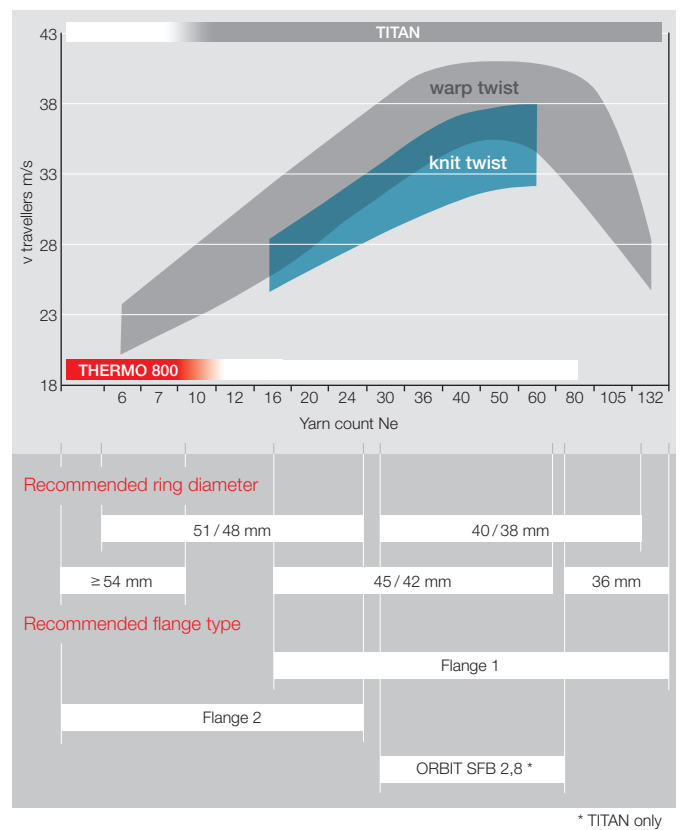

Micro structure of the THERMO 800 rings.

The THERMO 800 spinning ring is recommended especially for spinning core yarns for sewing threads and Denim yarns.

### Application ring finish, flange, ring diameter

### Ring lifetime depending on traveller-speed (experience)
